Locution Systems, Inc. Commissioned To Provide Fire Station Alerting System to Johnson County, Kansas

***Public safety technology firm to automate, streamline 911 dispatches
for Johnson County with natural voice dispatching technology,
automate fire station alerting operations***

GOLDEN, Colo., Dec. 7, 2004 – Locution Systems, Inc., a provider of new-generation, automated public safety dispatching and fire station alerting technology, today announced it has been commissioned to provide its fire station alerting system and automated, natural voice dispatching technology to the Johnson County, Kansas Emergency Communications Department. Johnson County covers the cities of Kansas City, Kansas, Overland Park, Olathe, and more. CADVoice®, Locution Systems’ flagship dispatching/fire station alerting product, will be used in 38 fire stations throughout Johnson County’s public safety network.

The Locution Systems CADVoice® product will be used to help 911 dispatchers automatically relay dispatches for fire and medical emergencies to fire stations throughout Johnson County. Locution Systems’ automated dispatching/fire station alerting product is being used in major cities across the nation, and has been proven to speed up response times by as much as two minutes, as well as reduce stress for dispatchers and fire/EMS personnel.

About Locution Systems, Inc.

Founded in 1986, Locution Systems, Inc. offers a comprehensive suite of new-generation technology products designed for public safety applications, such as emergency personnel dispatching and fire station alerting. Locution Systems' CADVoice® technology is based on "natural voice" technology – the "Mercedes" of voice-based systems. The flagship product, CADVoice® Fire, combines natural voice" dispatching technology with full fire station alerting (zoned dispatching, and automatic activation or de-activation of lighting, bay doors, traffic signals and more at fire stations). Additional CADVoice® products are designed for use in vehicles or for field personnel using radios, and supplementary email- and pager-enabled systems round out the product suite. Locution Systems' product suite features software-centric technology that's more cost-effective to maintain over time than traditional hardware-centric systems. The products are designed to easily integrate with today's industry-standard Computer-Aided Dispatching (CAD) systems. Locution Systems' products are in use in many major cities throughout the United States, and have been proven to speed response times, as well as reducing 911 call stacking, dispatcher stress and operational costs. Locution can be reached at (303) 932-0014, or www.locution.com.
